

This is a detailed land use planning map of a village area. The map is divided into numerous colored zones, each labeled with a code and a number. The zones include:

- R1 (Residential 1):** Yellow areas, typically found in the upper and middle sections of the map.
- R2 (Residential 2):** Orange areas, primarily located in the lower-left section.
- ZN (Zones of Natural Interest):** Green areas, often following linear features like roads or water bodies.
- MN (Mixed Use):** Brown areas, scattered throughout the central and upper-right portions.
- PU (Public Use):** Purple areas, including a large rectangular area in the lower-right and smaller patches elsewhere.
- WS (Water Service):** Blue areas, representing water bodies or service areas.

The map also shows infrastructure such as roads (indicated by grey lines), water bodies (blue areas), and green spaces (green areas). A scale bar at the bottom right indicates distances from 0 to 300 meters, and a north arrow is located next to it. The map is bordered by a thick black line, and various colored lines (red, green, blue, purple) delineate different planning boundaries or corridors.
